

Job Description: July 2021

Field Geophysicist / Geophysical Operators

Dias Geophysical is looking for geophysicists who are willing to learn new techniques and enjoy the outdoors.

You will be part of a diverse team of technicians, geophysicists and outdoor enthusiasts conducting state-of-the-art geophysical surveys in remote locations in all geographic regions and weather conditions, for up to 1 month at a time. Your responsibilities will include installing and maintaining geophysical equipment, operating in-house and commercial software, and managing data collection and data transfer.

The position offers the opportunity to advance into data processing and interpretation roles.

Prerequisites:

- BSc in Geophysics or equivalent experience.
- strong safety record and adherence to HSE systems.
- familiar with geophysical techniques such as Induced Polarization, Resistivity and Magnetotellurics.
- able to communicate effectively in English, in person, over email, and in the field using a handheld radio.
- extensive computer experience and experience with various software packages (QGIS, MS excel, etc).
- Ability to multi-task and work in a fast-paced environment.
- able to hike up several hours per day through rugged terrain with a backpack weighing up to 40lb.
- willingness to travel both domestically and internationally. Preferably possesses a valid Canadian passport. Other language skills (particularly Spanish) an asset.

Job Type: Contract, full time.

Location: Global with a concentration in Western Canada. Applicants from BC, Alberta and Saskatchewan preferred
