

FIELD TECHNICIAN-MOUNTAIN SPECIALIST

What we're looking for:

Dias Geophysical is looking for individuals with a passion for the outdoors and those who thrive in harsh mountain environments. In particular, individuals with experience climbing, mountaineering and traversing glaciers are sought-after. You will be part of a diverse team of technicians, geophysicists and outdoor enthusiasts conducting state-of-the-art geophysical surveys in remote locations in all geographic regions and weather conditions, for up to 1 month at a time. Your responsibilities will include embracing our progressive HSE practices and procedures and continue with carrying out a variety of duties related to our field activities- this work entails digging, lifting, carrying, hiking, driving and other physically demanding activities. Prior geophysics/geoscience experience, and/or mountain guiding an asset but most importantly we are looking for people who work well in a team, love the outdoors and have experience in mountainous terrain, and have a strong adherence to safety.

Prerequisites:

- Physically able to hike up to 10 hours per day through rugged terrain with a backpack weighing up to 40lb.
- Experience working or recreating safely off-trail in alpine environments.

- Good sense of direction and bush navigation skills- prior experience with map, GPS and compass an asset.
- Experience making route finding decisions in mountain environments.
- Able to communicate effectively in English, in person, over email, and in the field using a handheld radio.
- Strong safety record and adherence to HSE systems.
- Experience working around helicopters, including slinging operations, is an asset.
- Willingness to travel both domestically and internationally.
- Ability to solve problems in the field with the tools and materials at hand.

What we offer

- These are FULL-TIME positions paid at a daily rate commensurate with skills & experience.
- Flexible, short-term contracts also available.
- Benefits Package- including comprehensive health & dental coverage after a provisional period.
- Regional & International work opportunities without relocation! We arrange direct transport from most urban centres throughout Canada.
