

HSE MANAGER JOB DESCRIPTION

Who we are:

At Dias, our purpose is to create new technologies to image the earth and locate the resources that the world needs. We are passionate about technology, but nothing is more important than keeping our people safe and healthy.

Dias is a world leader in deploying solutions to help explore, map, and protect the subsurface. We operate globally from our home in Saskatoon with Canadian offices in Toronto and Vancouver, and international offices in Australia, Mexico, and Chile. We are currently looking for a skilled and dedicated individual to grow our team and ensure that Dias is a great place to work.

Primary Responsibilities:

Working based out of our Saskatoon office:

- Provide necessary direction, leadership and support in Health, Safety and Environment (HSE)
- Develop stringent procedures and systems to achieve excellence in our HSE program
- Develop a global HSE vision and strategy
- Provide Occupational HSE regulatory expertise
- Conduct HSE inspections, orientations, risk analyses, and safety audits
- Lead HSE meetings as required
- Lead incident investigations and reporting as well as direct corrective actions
- Provide HSE performance evaluations for employees and contractors
- Provide HSE support for Field Operations
- Periodically carry out field visits and inspections
- Administer HSE training programs to instruct workers on safe work practices and procedures
- Report on performance of HSE programs and processes for areas of responsibilities
- Review and revise the HSE manual and HSE management documentation
- Manage and administer Dias' online HSE recording, reporting and documentation system

Required Skills

- Degree, diploma or certification in Occupational Health and Safety
- Minimum of 5 years in an HSE role, preferably in the Seismic or Mineral Exploration Industry
- Experience in Hazard identification and Hazard communication and control measures
- Demonstrate good communication and leadership skills
- Strong knowledge of Federal and Provincial Occupational Health and Safety Legislation
- Proficiency in Microsoft Office and Outlook
- Ability to travel to remote or international locations
